

AN AUTOMOTIVE ART EXHIBITION BY DAVID GINN (GMA)

MONDAY 3 NOVEMBER TO FRIDAY 5 DECEMBER

David Ginn is an artist at heart having trained in automotive design and development. He is also a qualified mechanical engineer and was sponsored by Ford in the EQUIP MSc programme. He is currently a chartered engineer with IMechE.

He has a diverse background with a first degree in Geology and Geography and a Masters in Automotive Engineering with a well-travelled life living in the USA, Sweden, Germany and the UK. His art is equally diverse in subject matter, style, medium and influence. Many of his paintings show a keen eye on the geography that the roads traverse.

On leaving college he set up his own commercial art studio, David Ginn Designs, providing a wide range of artistic services including graphic design, advertising, brochure illustration as well as direct commissions for his paintings. His early automotive commissions were technical workshop manuals before he became more involved with automotive engineering.

He has worked for automotive suppliers and design development within a number of different manufacturers including Ford, Jaguar, Land Rover, Aston Martin, BMW, Vauxhal, Honda and GM Opel. More recently he has worked for some new electric and robot car startup companies.

His father, Maurice Ginn, worked with Charles Thompson in the Ford Design Studio and they were responsible for many of the iconic Ford models in the 60s, 70s and 80s. Charles kindly invited David to join the Guild of Motoring Artists' inaugural meeting back in 1986 where he was inducted as a committee member. He has been an active member ever since and was honoured to be the GMA Chairman from 2011 to 2023. He still helps organise GMA exhibitions including those held at the Club.

We hope you enjoy the diverse range of art on display in David's exhibition. Originals and prints are available as shown and commissions accepted.
